

Description:

**EASILY ASSEMBLED AND REPAIRABLE PLASTIC SHIPPING PALLET**

**Technical Field**

The present invention relates to various shipping pallets and more particularly to an easily assembled and repairable plastic shipping pallet that includes two or more plastic runner rails each including multiple top and bottom pegs for board mounting. When two or more plastic runner rails are secured to multiple plastic cross boards you form a pallet.

**Background Art**

Wooden pallets can be expensive, often break and become unusable after one or more uses, and can create disposal problems. Therefore, it would be desirable; to have a plastic pallet that could be used for multiple uses and repaired, if damaged. A plastic pallet is totally recyclable eliminating a disposal problem.

**General Summary Discussion of Invention**

It is thus an object of the invention to provide an easily assembled and repairable plastic pallet that includes two or more plastic runner rails, with multiple top/bottom pegs for board mounting. When two or more plastic

runner rails are secured to multiple plastic cross boards you form a pallet.

Accordingly, an easily assembled and repairable plastic shipping pallet is provided.

### **Brief Description of Drawings**

For a further understanding of the nature and objects of the present invention, reference should be made to the following detailed description, taken in conjunction with the accompanying drawings. This drawing is to be used for an illustrated purpose only.

- Figure 1 shows the view of the assembled pallet.
- Figure 2 shows the view of the pallet with no slats/boards on top.
- Figure 3 shows the side view of the pallet.
- Figure 4 top & side view of the 2x4/runner
- Figures 5& 6 view of board showing how it will mount onto 2x4/runner

Figures 1 through 6 show various aspects of an exemplary embodiment of the easily assembled and repairable plastic shipping pallet of the present invention. Easily assembled and repairable plastic shipping pallet includes two or more plastic runner rails, and multiple plastic cross

boards. It can be seen from the preceding description that an easily assembled and repairable plastic pallet has been provided.

It is noted that the embodiment of the easily assembled and repairable plastic shipping pallet described here in detail for exemplary purposes is, of course, subject to many different variations in structure, design, application and methodology. Because many varying and different embodiments may be made within the scope of the inventive concept (s) herein taught, and because many modifications may be made in the embodiment herein detailed in accordance with the descriptive requirements of the law, it is to be understood that the details herein are to be interpreted as illustrative and not in a limiting sense.
